

ADAM GLENN NICHOLSON

PROCESS ENGINEER // PUBLISHED AUTHOR // SYSTEMS ARCHITECT

"I don't fix problems. I eliminate the conditions that create them."

// SYSTEM PROFILE

DESIGNATION

Process Engineer

STATUS

ACTIVE // OPTIMIZING

FRAMEWORK

Lean Six Sigma Black Belt

BS

Industrial Engineering Tech.
Univ. of Southern Mississippi

MS

Engineering Management
University of Oklahoma

DBA

Business Admin. [ACTIVE]
Edgewood University
CI Research Focus

CERTS

LSS Black Belt
Google PM Certified
PMP [In Preparation]

MEMBER

// OPERATING PHILOSOPHY

I came up through the floor. Not through a leadership development program — operations and manufacturing, where I learned what systems look like when they run, and what they look like held together by workarounds nobody remembers creating. Seventeen years later, I engineer the process itself.

I hold a Lean Six Sigma Black Belt and am completing a Doctorate in Business Administration with a research focus on continuous improvement. I've written two books formalizing field-tested CI frameworks, and built three operational applications addressing safety communication, compliance visibility, and institutional knowledge capture.

// CAPABILITY DOMAINS

- > Process Engineering & Standard Work Design
- > Continuous Improvement (DMAIC / Kaizen / 5S)
- > Maintenance Systems (CMMS / Predictive Maint.)
- > Project Management & Foreign Trade Zone Admin.
- > Technology: SQL, Raspberry Pi, SAP, AI Integration
- > Application Development & Knowledge Systems

// ACADEMIC FOUNDATION

Connors State College

2021 — 2022

Associate in Arts

General academic foundation. Coordinator, Phi Theta Kappa.

University of Southern Mississippi

BS, Industrial Engineering Technology

VP, Student Alumni Association.

University of Oklahoma

MS, Engineering Management

Fusion of technical depth and organizational leadership.

Edgewood University

DBA, Business Administration [ACTIVE]

Research: CI-sustaining leadership behaviors. Capstone: Dal-Tile supply chain & negotiations.

OPERATIONS LOG

2008 — 2019

Dal-Tile Corporation

Operations & Manufacturing

Eleven years building the operational foundation — cross-functional production leadership, waste elimination, and the floor-level credibility every subsequent role would leverage.

2019 — 2022

Dal-Tile Corporation

Industrial Maintenance

Hands-on diagnostics and repair across the equipment portfolio. Spare parts coordination, root-cause troubleshooting, and cross-functional collaboration with operations — the technical foundation for everything that followed.

2022 — 2025

Vallourec

Maintenance Planner → Supervisor → PM / FTZ Admin

Built a formal maintenance system from zero — SAP CMMS, 13-technician team, 90% sustained PM completion rate, engineered safety redesign. Promoted into dual Project Manager / Foreign Trade Zone Administrator responsibility at multinational scale with zero compliance failures.

2025 — PRESENT

Dal-Tile Corporation

Process Engineer

In-house 3D printing implementation. Live Safety Communication App. EMS Compliance and Troubleshooting/Knowledge Capture applications in development. AI integration into operational improvement frameworks.
